

Not your regular softy

All nippers are made of soft steel.
Ours are the only ones that last decades.

CRUSH STOPPERS – Ground-breaking innovation prevents over-squeezing the nipper, and the razor-sharp blades never “crush” each other, allowing the nippers to remain sharp!

52 ROCKWELL – Unique technology allows the use of super hard steel so the nippers stay sharper, longer. It also allows for honing the nipper. Simply run the blades two or three times along a genuine Arkansas stone (included). Our nippers will stay razor sharp for decades!

HONABLE – Get trained using genuine Arkansas sharpening stone we include with your nippers to touch up the blades from time to time. You’ll never need to send it for sharpening. Always work with razor sharp nippers.

NEW JOINT – Our innovative, beveled joint minimizes friction for easier cuts and reduced wear.

SOLINGEN - Hand sharpened! Every Germanikure nipper is sharpened manually with a file (not a grinder) by Solingen artisans.

12 UNIQUE HEADS – Choose from three different head shapes, each available in 3, 5, 7 and 9mm.

OPEN JOINT – Our “open” design allows for easy lubrication, and eliminates crevices where dirt and moisture can collect over time.

LEATHER ROLL – Our nippers come in a special, protective leather roll containing the genuine Arkansas honing stone, and our unique lubri-pen to ensure all your manicure tools last for decades!

DOUBLE SPRINGS – Friction-free squeezing! Allows for a smooth, controllable cut.

SURGICAL STEEL – Made of high carbon stainless steel, our nippers will never pit, crack, chip, or rust.

With **GERMANIKURE**, it's about high quality and low maintenance.

To keep your tool working great, everything you need to ensure decades of use is contained in the leather roll. The Arkansas stone will keep the blades razor sharp in just seconds, and our special Lubri-Pen helps keeps your tools in smooth working order. Lubricate the blades once, then sterilize many times until you'll need to lubricate again! And use a drop or two of the oil on your honing stone to make the blades sharpen effortlessly.

And, we're Eco-friendly.

Our nippers (like all of our products) are also ethically and eco-consciously made, crafted by trained adult artisans. In fact, our company actively campaigns against child labor. We believe in affordability over greed and we package our tools in plastic-free, 100% recyclable material, having been produced in environmentally conscious factories. You can rest assured that our nipper is not only well-designed and long-lasting, but is also ethically made, fairly priced, environmentally sound, and will not end up in landfills like most other nippers.

Why?

Ethical, sustainable, ecological, innovative,
inspirational, efficient, transparent

No phony smiles here. We value ethical practices and an ecologically sustainable future for our children far more than profit. We believe practices contrary to these ideals are repulsive and we utilize no child labor, no planned obsolescence, no factories that have reprehensible waste and which have no environmental conscience; NO. The highest quality, longevous products can be affordable to regular people...in fact, anything less is unaffordable.

With these tenants as the core of our business practice, we have created the finest precision made manicure products in Solingen, Germany..."the city of blades" - world renowned for its impeccable steel manufacturing. Meticulously engineered with pride, care and attention to detail by adult artisans, our unique designs prevent wear, so the same product can last your family for generations. Specifically designed to provide smooth cutting instead of crushing, trimming instead of ripping, and finite shaping instead of micro-tearing, our products provide you with the healthiest treatment for your nails.

Loving yourself is the first step to loving others.
We are Germanikure.
Welcome to our family
